

The **NEW**

IMPROVED

J55-B

by OUTBOARD JET

All the special features of Outboard Jet's original J55 model PLUS:

- FASTER**
(35% more thrust)
- LIGHTER**
(5 lbs. less)
- QUIETER**
(New molded cowling)
- SMOOTHER**
(New rubber mountings)
- EASIER TO OPERATE**
(New aircraft-type controls)

THE IDEAL MOTOR FOR FISHERMEN, HUNTERS

- Greater shallow water capability—nothing extends below the hull •
- maneuvers exceptionally • turns in a boat's length • reverses instantly •
- has no dangerous propeller • runs two hours on a gallon of fuel

The OUTBOARD JET J55-B

Standard Equipment for the Outdoor Sportsman . . .

The Outboard Jet . . . the sportsman's taxi to the shallow inlets where the big fish are or to that remote duck blind . . . places where no propeller motor could take you.

Here is the motor fishermen and hunters have been waiting for. Outboard Jet takes your boat through the shallowest water (limited only by your boat's draft)—no part of the motor need extend below the hull to snag weeds, roots, and submerged logs . . . no dangerous propeller to injure swimmers. And talk about maneuverability—the Outboard Jet turns and circles in a boat's length, reverses instantly. Yet this economical motor permits approximately two hours of boating on a single gallon of fuel . . . a whole day of fishing or hunting on its three-gallon tank.

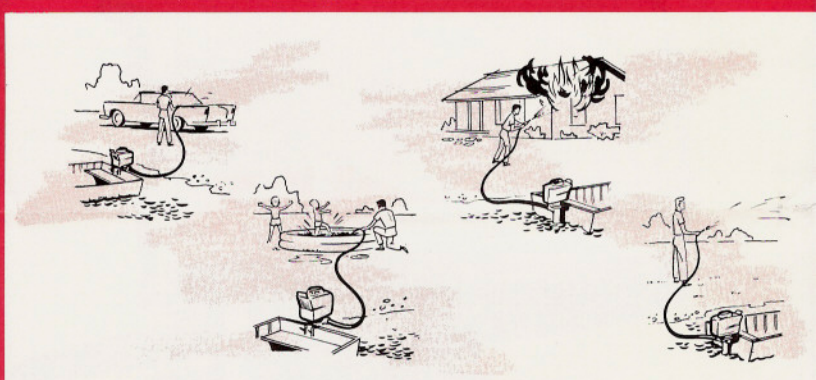

This is jet-propelled boating. A powerful stream of water is forced through the jet nozzle . . . **above the water line** . . . producing more efficient thrust, a more level ride, greater fuel economy. It's more fun too than any 5½ hp motor you've ever tried!

OPTIONAL EQUIPMENT

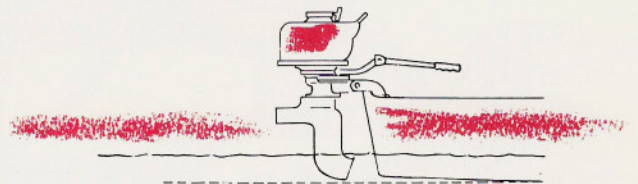

WEED SWEEPER—Because the Outboard Jet need not hang below the keel, it will pass over many weeds which would stop a propeller-driven craft. If you wish to pass through exceptionally heavy vegetation, a Weed Sweeper is available.

WATER HOSE ATTACHMENT—Your Outboard Jet is also a powerful, efficient pump. It jets 1000 gallons a minute at the spout. With the hose attachment, you can use your Outboard Jet to sprinkle your lawn, wash your car, fill water tanks, or fight fires. Hose, hardware, and nozzle are available.

YOUR NEAREST DEALER IS

You can probably think of many uses for the Outboard Jet hose attachment, optional with every motor. Watering lakefront lawns, washing cars or boats, filling water tanks, and fire-fighting are a few suggestions.

As this schematic drawing indicates, no part of the Outboard Jet motor need extend below the hull, which simply means "you go where others row."

Quick Facts About The J55-B

HP	5½
Thrust	100 lbs.
Weight	52 lbs.

A wide range of speeds, from slow trolling to wide open cruising • An all-new molded cowling for sleeker lines and muffled engine noise • Rubber mountings to reduce vibration • Convenient aircraft-type controls • Remote 3-gallon fuel tank.
